

BIO 300: INTRODUCTION TO GENETICS (NEELY)

Introduction to Genetics (Neely)

This text is disseminated via the Open Education Resource (OER) LibreTexts Project (<https://LibreTexts.org>) and like the thousands of other texts available within this powerful platform, it is freely available for reading, printing, and "consuming."

The LibreTexts mission is to bring together students, faculty, and scholars in a collaborative effort to provide an accessible, and comprehensive platform that empowers our community to develop, curate, adapt, and adopt openly licensed resources and technologies; through these efforts we can reduce the financial burden born from traditional educational resource costs, ensuring education is more accessible for students and communities worldwide.

Most, but not all, pages in the library have licenses that may allow individuals to make changes, save, and print this book. Carefully consult the applicable license(s) before pursuing such effects. Instructors can adopt existing LibreTexts texts or Remix them to quickly build course-specific resources to meet the needs of their students. Unlike traditional textbooks, LibreTexts' web based origins allow powerful integration of advanced features and new technologies to support learning.

LibreTexts is the adaptable, user-friendly non-profit open education resource platform that educators trust for creating, customizing, and sharing accessible, interactive textbooks, adaptive homework, and ancillary materials. We collaborate with individuals and organizations to champion open education initiatives, support institutional publishing programs, drive curriculum development projects, and more.

The LibreTexts libraries are Powered by [NICE CXone Expert](#) and was supported by the Department of Education Open Textbook Pilot Project, the California Education Learning Lab, the UC Davis Office of the Provost, the UC Davis Library, the California State University Affordable Learning Solutions Program, and Merlot. This material is based upon work supported by the National Science Foundation under Grant No. 1246120, 1525057, and 1413739.

Any opinions, findings, and conclusions or recommendations expressed in this material are those of the author(s) and do not necessarily reflect the views of the National Science Foundation nor the US Department of Education.

Have questions or comments? For information about adoptions or adaptations contact info@LibreTexts.org or visit our main website at <https://LibreTexts.org>.

TABLE OF CONTENTS

Licensing

1: Chemistry to Chromosomes

- 1.1: The Structure of DNA
- 1.2: Chromosomes and chromatin
- 1.3: Mitosis
 - 1.3.1: DNA replication
- 1.4: In vitro applications of DNA replication
- 1.5: Genomes and variation
- 1.6: Chapter 1 Review Questions

2: Central Dogma

- 2.1: Overview of Transcription
- 2.2: RNA processing
- 2.3: Genetic Code and Translation
- 2.4: Chapter 2 Review Questions

3: Mutation

- 3.1: Origins of Mutations
- 3.2: Consequences of mutations
- 3.3: Example - Mutations and Cystic Fibrosis
- 3.4: Ames Test
- 3.5: DNA Repair
- 3.6: Chapter 3 Review Questions

4: Inheritance

- 4.1: Meiosis
 - 4.1.1: Homologous recombination
 - 4.1.2: CRISPR
- 4.2: Mendelian Genetics
 - 4.2.1: Monohybrid Crosses and Segregation
 - 4.2.2: Dihybrid Crosses and Independent Assortment
- 4.3: Pedigrees
- 4.4: Exceptions to autosomal inheritance
 - 4.4.1: Inheritance patterns for X-linked and Y-linked genes
 - 4.4.2: Organellar Inheritance
- 4.5: Linkage
 - 4.5.1: Linkage and Mapping
 - 4.5.2: GWAS
- 4.6: Exceptions to simple dominance
- 4.7: Gene Interactions
 - 4.7.1: Complementation Test
- 4.8: Chapter 4 Review Questions (draft)

5: Chromosome variation

- [5.1: Changes in Chromosome Number](#)
- [5.2: Changes in Chromosome Structure](#)
- [5.3: Chapter 5 Review Questions \(Draft\)](#)

6: Regulation of Gene Expression

- [6.1: Prokaryotic gene regulation](#)
 - [6.1.1: The Use of Mutants to Study the lac Operon](#)
 - [6.1.2: The Lux Operon](#)
- [6.2: Eukaryotic Gene Regulation](#)
 - [6.2.1: Gene Expression in Evolution](#)
 - [6.2.2: Regulating Transcription at the Chromatin Level](#)
 - [6.2.3: microRNAs](#)
- [6.3: Epigenetics](#)
- [6.4: Chapter 6 Review Questions \(Draft\)](#)
- [6.5: Chapter 6 Review Questions Draft](#)

7: Manipulating and Analyzing Genes and Genomes

- [7.1: Analysis of STRs](#)
- [7.2: Transgenic Organisms](#)

8: Cancer Genetics

- [8.1: Classification of Cancers](#)
- [8.2: Hallmarks of Cancer](#)
- [8.3: Mutagens and Carcinogens](#)
- [8.4: Oncogenes](#)
- [8.5: Tumor Suppressor Genes](#)
- [8.6: Genetics and Targeted Cancer Treatment – The Story of Gleevec™ \(Imatinib\)](#)
- [8.7: Cancer Genetics \(Exercises\)](#)
- [8.8: Chapter 8 Review Questions](#)

9: Homework

- [9.1: 1. Instructions](#)
- [9.2: Homework 2](#)
