This text is disseminated via the Open Education Resource (OER) LibreTexts Project (<https://LibreTexts.org>) and like the thousands of other texts available within this powerful platform, it is freely available for reading, printing, and "consuming."

The LibreTexts mission is to bring together students, faculty, and scholars in a collaborative effort to provide an accessible, and comprehensive platform that empowers our community to develop, curate, adapt, and adopt openly licensed resources and technologies; through these efforts we can reduce the financial burden born from traditional educational resource costs, ensuring education is more accessible for students and communities worldwide.

Most, but not all, pages in the library have licenses that may allow individuals to make changes, save, and print this book. Carefully consult the applicable license(s) before pursuing such effects. Instructors can adopt existing LibreTexts texts or Remix them to quickly build course-specific resources to meet the needs of their students. Unlike traditional textbooks, LibreTexts' web based origins allow powerful integration of advanced features and new technologies to support learning.

LibreTexts is the adaptable, user-friendly non-profit open education resource platform that educators trust for creating, customizing, and sharing accessible, interactive textbooks, adaptive homework, and ancillary materials. We collaborate with individuals and organizations to champion open education initiatives, support institutional publishing programs, drive curriculum development projects, and more.

The LibreTexts libraries are Powered by [NICE CXone Expert](#) and was supported by the Department of Education Open Textbook Pilot Project, the California Education Learning Lab, the UC Davis Office of the Provost, the UC Davis Library, the California State University Affordable Learning Solutions Program, and Merlot. This material is based upon work supported by the National Science Foundation under Grant No. 1246120, 1525057, and 1413739.

Any opinions, findings, and conclusions or recommendations expressed in this material are those of the author(s) and do not necessarily reflect the views of the National Science Foundation nor the US Department of Education.

Have questions or comments? For information about adoptions or adaptations contact info@LibreTexts.org or visit our main website at <https://LibreTexts.org>.

TABLE OF CONTENTS

Licensing

1: Descriptive Statistics and the Normal Distribution

- 1.1: Descriptive Statistics
- 1.2: Probability Distribution

2: Sampling Distributions and Confidence Intervals

- 2.1: Sampling Distribution of the Sample Mean
- 2.2: Confidence Intervals

3: Hypothesis Testing

- 3.1: The Fundamentals of Hypothesis Testing
- 3.2: Hypothesis Test about the Population Mean when the Population Standard Deviation is Known
- 3.3: Hypothesis Test about the Population Mean when the Population Standard Deviation is Unknown
- 3.4: Hypothesis Test for a Population Proportion
- 3.5: Hypothesis Test about a Variance
- 3.6: Putting it all Together Using the Classical Method

4: Inferences about the Differences of Two Populations

- 4.1: Inferences about Two Means with Independent Samples (Assuming Unequal Variances)
- 4.2: Pooled Two-sampled t-test (Assuming Equal Variances)
- 4.3: Inferences about Two Means with Dependent Samples—Matched Pairs
- 4.4: Inferences about Two Population Proportions
- 4.5: F-Test for Comparing Two Population Variances
- 4.6: Summary

5: One-Way Analysis of Variance

- 5.1: Analysis of Variance
- 5.2: Multiple Comparisons

6: Two-way Analysis of Variance

- 6.1: Main Effects and Interaction Effect
- 6.2: Multiple Comparisons
- 6.3: Summary And Software Solution

7: Correlation and Simple Linear Regression

- 7.1: Correlation
- 7.2: Simple Linear Regression
- 7.3: Population Model
- 7.4: Software Solution

8: Multiple Linear Regression

- 8.1: Multiple Regressions
- 8.2: Software Solution

9: Modeling Growth, Yield, and Site Index

- [9.1: Growth and Yield Models](#)
- [9.2: Site Index](#)
- [9.3: Reference](#)

10: Quantitative Measures of Diversity, Site Similarity, and Habitat Suitability

- [10.1: Introduction, Simpson's Index and Shannon-Weiner Index](#)
- [10.2: Rank Abundance Graphs and Habitat Suitability Index](#)
- [10.3: Reference](#)

11: Biometric Labs

- [11.1: Biometrics Lab #1](#)
- [11.2: Biometrics Lab #2](#)
- [11.3: Biometrics Lab #3](#)
- [11.4: Biometrics Lab #4](#)
- [11.5: Biometrics Lab #5](#)
