Statistics Done Wrong

This text is disseminated via the Open Education Resource (OER) LibreTexts Project (<https://LibreTexts.org>) and like the thousands of other texts available within this powerful platform, it is freely available for reading, printing, and "consuming."

The LibreTexts mission is to bring together students, faculty, and scholars in a collaborative effort to provide an accessible, and comprehensive platform that empowers our community to develop, curate, adapt, and adopt openly licensed resources and technologies; through these efforts we can reduce the financial burden born from traditional educational resource costs, ensuring education is more accessible for students and communities worldwide.

Most, but not all, pages in the library have licenses that may allow individuals to make changes, save, and print this book. Carefully consult the applicable license(s) before pursuing such effects. Instructors can adopt existing LibreTexts texts or Remix them to quickly build course-specific resources to meet the needs of their students. Unlike traditional textbooks, LibreTexts' web based origins allow powerful integration of advanced features and new technologies to support learning.

LibreTexts is the adaptable, user-friendly non-profit open education resource platform that educators trust for creating, customizing, and sharing accessible, interactive textbooks, adaptive homework, and ancillary materials. We collaborate with individuals and organizations to champion open education initiatives, support institutional publishing programs, drive curriculum development projects, and more.

The LibreTexts libraries are Powered by [NICE CXone Expert](#) and was supported by the Department of Education Open Textbook Pilot Project, the California Education Learning Lab, the UC Davis Office of the Provost, the UC Davis Library, the California State University Affordable Learning Solutions Program, and Merlot. This material is based upon work supported by the National Science Foundation under Grant No. 1246120, 1525057, and 1413739.

Any opinions, findings, and conclusions or recommendations expressed in this material are those of the author(s) and do not necessarily reflect the views of the National Science Foundation nor the US Department of Education.

Have questions or comments? For information about adoptions or adaptations contact info@LibreTexts.org or visit our main website at <https://LibreTexts.org>.

Introduction

1: An Introduction to Data Analysis

- 1.1: Data Analysis
- 1.2: The Power of p Values

2: Statistical Power and Underpowered Statistics

- 2.1: Statistical Power
- 2.2: The Power of Being Underpowered
- 2.3: The Wrong Turn on Red

3: Pseudoreplication- Choose Your Data Wisely

4: The p Value and the Base Rate Fallacy

- 4.1: Prelude to p Values
- 4.2: The Base Rate Fallacy in Medical Testing
- 4.3: Taking up Arms Against the Base Rate Fallacy
- 4.4: If at First You Don't Succeed, Try, Try Again
- 4.5: Red Herrings in Brain Imaging
- 4.6: Controlling the False Discovery Rate

5: When Differences in Significance Aren't Significant Differences

- 5.1: Differences in Significance
- 5.2: When Significant Differences are Missed

6: Stopping Rules and Regression to the Mean

- 6.1: Rules of the Game
- 6.2: Truth Inflation
- 6.3: Little Extremes

7: Researcher Freedom- Good Vibrations?

8: Everybody Makes Mistakes

9: Hiding the Data

- 9.1: Handling Data
- 9.2: Just Leave out the Details
- 9.3: Science in a Filing Cabinet

10: What Have We Wrought?

11: What Can be Done?

- 11.1: Statistical Education
- 11.2: Scientific Publishing
- 11.3: Your Job

12: Conclusion
