

UCD GEL 56- INTRODUCTION TO GEOPHYSICS

UCD GEL 56- Introduction to Geophysics

This text is disseminated via the Open Education Resource (OER) LibreTexts Project (<https://LibreTexts.org>) and like the thousands of other texts available within this powerful platform, it is freely available for reading, printing, and "consuming."

The LibreTexts mission is to bring together students, faculty, and scholars in a collaborative effort to provide an accessible, and comprehensive platform that empowers our community to develop, curate, adapt, and adopt openly licensed resources and technologies; through these efforts we can reduce the financial burden born from traditional educational resource costs, ensuring education is more accessible for students and communities worldwide.

Most, but not all, pages in the library have licenses that may allow individuals to make changes, save, and print this book. Carefully consult the applicable license(s) before pursuing such effects. Instructors can adopt existing LibreTexts texts or Remix them to quickly build course-specific resources to meet the needs of their students. Unlike traditional textbooks, LibreTexts' web based origins allow powerful integration of advanced features and new technologies to support learning.

LibreTexts is the adaptable, user-friendly non-profit open education resource platform that educators trust for creating, customizing, and sharing accessible, interactive textbooks, adaptive homework, and ancillary materials. We collaborate with individuals and organizations to champion open education initiatives, support institutional publishing programs, drive curriculum development projects, and more.

The LibreTexts libraries are Powered by [NICE CXone Expert](#) and was supported by the Department of Education Open Textbook Pilot Project, the California Education Learning Lab, the UC Davis Office of the Provost, the UC Davis Library, the California State University Affordable Learning Solutions Program, and Merlot. This material is based upon work supported by the National Science Foundation under Grant No. 1246120, 1525057, and 1413739.

Any opinions, findings, and conclusions or recommendations expressed in this material are those of the author(s) and do not necessarily reflect the views of the National Science Foundation nor the US Department of Education.

Have questions or comments? For information about adoptions or adaptations contact info@LibreTexts.org or visit our main website at <https://LibreTexts.org>.

TABLE OF CONTENTS

Licensing

Geophysics is everywhere in geology...

- Supporting Topics
- Units, Conversions, and Physical Constants
- 1: Rheology of Rocks
 - 1.0: Introduction to Rheology
 - 1.1: Stress
 - 1.2: Strain and Strain Rate
 - 1.3: Elastic Deformation
 - 1.4: Failure of Rocks
 - 1.5: Viscous Deformation
 - 1.6 Inclined Plane Jupyter Notebook
 - 1.7: Summary
- 2: Diffusion and Darcy's Law
 - 2.0: Introduction to Diffusion and Darcy's Law
 - 2.1: The Diffusion Equation
 - 2.2: Geological Applications of the Diffusion Equation
 - 2.3: Lithospheric Thickness Jupyter Notebook
 - 2.4: Erosion Profile Jupyter Notebook
 - 2.5: Darcy's Law - Flow in a Porous Medium
 - 2.6: Summary
- 3: Planetary Geophysics
 - 3.0: Introduction
 - 3.1: Orbital Mechanics
 - 3.2: Layered Structure of a Planet
 - 3.3: Two Layer Planet Structure Jupyter Notebook
 - 3.4: Isostasy
 - 3.5: Isostasy Jupyter Notebook
 - 3.5: Observing the Gravity Field
 - 3.7: Gravitational Potential, Mass Anomalies and the Geoid
 - 3.8: Summary
- 4: Plate Tectonics
 - 4.0: Introduction to Plate Tectonics
 - 4.1: The Forces Driving Plate Motions
 - 4.2: Magnetic Anomalies on the Seafloor
 - 4.3 Magnetic Anomaly Jupyter Notebook
 - 4.4: Plates Moving on a Plane
 - 4.5: Relative Velocity and Reference Frames
 - 4.6: Relative Plate Velocity Jupyter Notebook
 - 4.7: Plate Motions on a Sphere
 - 4.8: Summary
- 5: Seismology
 - 5.0: Introduction to Seismology
 - 5.1: Basics of Wave Propagation

- [5.2: Seismic Refraction \(Single Layer\)](#)
- [5.3 Seismic Refraction Jupyter Notebook](#)
- [5.4: Seismic Reflection \(Single Layer\)](#)
- [5.5 Seismic Reflection Jupyter Notebook](#)
- [5.6: Summary](#)
- [6: Earthquakes](#)
 - [6.0: Introduction to Earthquakes](#)
 - [6.1: Earthquake Geometry and Process](#)
 - [6.2: Earthquake Magnitude](#)
 - [6.3: Location and Focal Mechanisms](#)
 - [6.4: Earthquake Distance and Magnitude Jupyter Notebook](#)
 - [6.5: Earthquake Scaling Laws](#)
 - [6.6: Summary](#)
- [Index](#)
- [Arctan vs Arctan2](#)
- [Ipywidgets Interact Example](#)
