This text is disseminated via the Open Education Resource (OER) LibreTexts Project (<https://LibreTexts.org>) and like the thousands of other texts available within this powerful platform, it is freely available for reading, printing, and "consuming."

The LibreTexts mission is to bring together students, faculty, and scholars in a collaborative effort to provide an accessible, and comprehensive platform that empowers our community to develop, curate, adapt, and adopt openly licensed resources and technologies; through these efforts we can reduce the financial burden born from traditional educational resource costs, ensuring education is more accessible for students and communities worldwide.

Most, but not all, pages in the library have licenses that may allow individuals to make changes, save, and print this book. Carefully consult the applicable license(s) before pursuing such effects. Instructors can adopt existing LibreTexts texts or Remix them to quickly build course-specific resources to meet the needs of their students. Unlike traditional textbooks, LibreTexts' web based origins allow powerful integration of advanced features and new technologies to support learning.

LibreTexts is the adaptable, user-friendly non-profit open education resource platform that educators trust for creating, customizing, and sharing accessible, interactive textbooks, adaptive homework, and ancillary materials. We collaborate with individuals and organizations to champion open education initiatives, support institutional publishing programs, drive curriculum development projects, and more.

The LibreTexts libraries are Powered by [NICE CXone Expert](#) and was supported by the Department of Education Open Textbook Pilot Project, the California Education Learning Lab, the UC Davis Office of the Provost, the UC Davis Library, the California State University Affordable Learning Solutions Program, and Merlot. This material is based upon work supported by the National Science Foundation under Grant No. 1246120, 1525057, and 1413739.

About The Author

Alise Lamoreaux has a long history of teaching non-traditional students who are preparing for the GED and transitioning to college. She teaches a class called, “Everything You Want to Know About College, Before You Start” along with Hybrid GED courses at Lane Community College. Alise is known for her willingness to learn and use new technologies in the classroom, such as digital storytelling, learning management systems, and other online resources. She is an advocate of student success. Throughout the years, she has demonstrated her willingness to teach other professionals how they might also implement innovative technologies in the classroom. This year, she took on the challenge of writing an open source textbook, through a grant she received from openoregon.org, titled, A Different Road To College: A Guide for Transitioning Non-traditional Students. This free resource is designed to engage students in seeing themselves as college students and understanding the complexity of what that means to their lives, as well as helping to unlock the contextual complexities of the culture of college.
