

ASTRONOMY 10: THE SOLAR SYSTEM (TEXT)

Andrew Totah-McCarty
Chabot College

Astronomy 10: The Solar System (Text)

This text is disseminated via the Open Education Resource (OER) LibreTexts Project (<https://LibreTexts.org>) and like the thousands of other texts available within this powerful platform, it is freely available for reading, printing, and "consuming."

The LibreTexts mission is to bring together students, faculty, and scholars in a collaborative effort to provide an accessible, and comprehensive platform that empowers our community to develop, curate, adapt, and adopt openly licensed resources and technologies; through these efforts we can reduce the financial burden born from traditional educational resource costs, ensuring education is more accessible for students and communities worldwide.

Most, but not all, pages in the library have licenses that may allow individuals to make changes, save, and print this book. Carefully consult the applicable license(s) before pursuing such effects. Instructors can adopt existing LibreTexts texts or Remix them to quickly build course-specific resources to meet the needs of their students. Unlike traditional textbooks, LibreTexts' web based origins allow powerful integration of advanced features and new technologies to support learning.

LibreTexts is the adaptable, user-friendly non-profit open education resource platform that educators trust for creating, customizing, and sharing accessible, interactive textbooks, adaptive homework, and ancillary materials. We collaborate with individuals and organizations to champion open education initiatives, support institutional publishing programs, drive curriculum development projects, and more.

The LibreTexts libraries are Powered by [NICE CXone Expert](#) and was supported by the Department of Education Open Textbook Pilot Project, the California Education Learning Lab, the UC Davis Office of the Provost, the UC Davis Library, the California State University Affordable Learning Solutions Program, and Merlot. This material is based upon work supported by the National Science Foundation under Grant No. 1246120, 1525057, and 1413739.

Any opinions, findings, and conclusions or recommendations expressed in this material are those of the author(s) and do not necessarily reflect the views of the National Science Foundation nor the US Department of Education.

Have questions or comments? For information about adoptions or adaptations contact info@LibreTexts.org or visit our main website at <https://LibreTexts.org>.

The LibreTexts name, logo, and book covers are trademarked by LibreTexts, Inc. (a 501(c)(3) not-for-profit organization) and protected against unauthorized use.

TABLE OF CONTENTS

Licensing

1: Introduction to Astronomy

- 1.1: The Nature of Astronomy
- 1.2: A Tour of the Universe

2: Observing the Sky

- 2.1: The Sky Above
- 2.2: Astrology and Astronomy
- 2.3: The Seasons
- 2.4: Phases and Motions of the Moon
- 2.5: The Birth of Modern Astronomy

3: Gravity and Orbits

- 3.1: Newton's Universal Law of Gravitation
- 3.2: Gravity with More Than Two Bodies
- 3.3: Ocean Tides and the Moon
- 3.4: The Laws of Planetary Motion
- 3.5: Motions of Satellites and Spacecraft

4: Measuring Light

- 4.1: The Electromagnetic Spectrum
- 4.2: The Brightness of Stars
- 4.3: The Doppler Effect
- 4.4: Planets beyond the Solar System- Search and Discovery
- 4.5: Spectroscopy in Astronomy
- 4.6: The Structure of the Atom
- 4.7: Formation of Spectral Lines
- 4.8: Telescopes

5: Planetary Systems

- 5.1: Overview of Our Planetary System
- 5.2: Formation of the Solar System
- 5.3: Asteroids
- 5.4: The "Long-Haired" Comets
- 5.5: The Origin and Fate of Comets and Related Objects
- 5.6: Composition and Structure of Planets
- 5.7: Earth's Crust
- 5.8: Atmosphere of the Giant Planets

6: Planetary Change and Life

- 6.1: Impact Craters
- 6.2: The Massive Atmosphere of Venus
- 6.3: Earth's Atmosphere
- 6.4: Divergent Planetary Evolution

- [6.5: Life, Chemical Evolution, and Climate Change](#)
- [6.6: Water and Life on Mars](#)
- [6.7: The Cosmic Context for Life](#)
- [6.8: Searching for Life beyond Earth](#)
- [6.9: The Search for Extraterrestrial Intelligence](#)

7: Our Solar System

- [7.1: General Properties of the Moon](#)
- [7.2: Mercury](#)
- [7.3: The Geology of Venus](#)
- [7.4: The Geology of Mars](#)
- [7.5: Exploring the Outer Planets](#)
- [7.6: The Giant Planets](#)
- [7.7: The Gailean Moons of Jupiter](#)
- [7.8: Titan and Triton](#)
- [7.9: Pluto and Charon](#)
- [7.10: Planetary Rings](#)
